Ballistic Testing Supply Prices (2021)
Pricing Valid Through December 31, 2021

Ballistic Testing Materials

Material	Price per kg	Standard Product Form
Roma Plastilina #1 Modeling Clay	\$50	1 kg block
ARTIC Temperature Insensitive Clay	\$100	1 kg block
Reusable Clear Ballistic Gel (Synthetic)	\$40	16"x6"x6" block (approx. 8 kg)

Alternative Product Forms:

In addition to the standard product forms, Dalcom offers our ballistic testing materials fully formed and ready to shoot for their most common forms of testing. In addition to the following forms, we are equipped to provide virtually any other custom form a customer may need. All surcharges listed are in addition to per-kg material prices.

Material	Form	Approximate Order Mass*	Surcharge
Roma Plastilina #1 Modeling Clay	24"x24"x5.5" Test Box	65 kg	\$1,000 per box (includes reusable test box)
ARTIC Temperature Insensitive Clay	24"x24"x5.5" Test Box	65 kg	\$1,000 per box (includes reusable test box)
Reusable Clear Ballistic Gel (Synthetic)	Std. Male Human Head	5.5 kg	\$150 per form
Reusable Clear Ballistic Gel (Synthetic)	Std. Male Human Upper Torso	27 kg	\$200 per form
* Mass of ballistic test material (excluding shipping container or test box)			

Shipping:

All standard product forms (domestic or international) will be shipped commercially with the cost included in the order total. Any forms in excess of 30kg ordered domestically will be shipped directly at a rate of **\$250 per unit**.
